CacheNET 10Ks:

► COLLECT & SECURE CASH:

Once your cash is placed in an Armor safe, you can rest assured it will stay there. Our products are designed and constructed to rigorous standards to protect each point of access and reduce your risk of robbery.

► COUNT & VALIDATE FUNDS:

The CacheNET® 10K is equipped with GRG's high speed bill counting technology, allowing it to recognize 600 bills per minute with world-class counterfeit detection. Counted funds are secured in high-capacity reusable deposit bags that store up to 10,000 bills. Exposure is limited, reducing risk of theft and loss. And cash may be returned if the transaction is cancelled.

► AUDIT & REPORT ACTIVITY:

Every transaction is recorded and tracked through each user's PIN providing an audit trail of all activity. Cash is deposited and validated by high-speed bill counter. Immediate verification reduces POS reconciliation errors and reduces time spent on bank deposit preparations. Numerous receipts and reports can be printed using the system's high-speed printer including end-of-day activity, cash removal reports, and individual user reports.

► COMMUNICATE:

The CacheNET® 10K allows the user to access and evaluate transaction data, providing real-time comparisons with POS activity.

TECHNOLOGY

FEATURES

- User-friendly 7" touchscreen for ease of use & faster end-user training
